Professional Summary

Google Certified Associate Android Developer with 10+ years of experience writing top-quality, clean code for enterprise companies and startups. Dedicated to continuously developing new features, collaborating with cross-functional teams, and improving existing codebases utilizing Agile methodologies, including Scrum and Kanban.

Technical Skills

- Core: Kotlin, Swift, Java, Coroutines, Flow, Kotlin Multiplatform.
- Android Tech Stack: Jetpack Compose, Android SDK, Gradle Koin, Firebase.
- Architecture: MVI, MVVM, Clean Architecture, SOLID.
- Tooling: git, CI/CD, MCP, AI Agents, TDD, A/B Testing, fastlane.

Work Experience

Senior Android Engineer | Experian | 2026 - Present

- Ship to the Experian® Android app (10M+ downloads on Google Play).
- Drive the Experimentation team by implementing A/B tests and UI/UX experiments to optimize user engagement and flows across current mobile applications.
- Develop cross-platform capabilities, adapting to iOS constraints and requirements to ensure feature parity and smooth experiment rollouts.

Senior Kotlin Multiplatform Engineer | Swiftly | 2022 - 2026

- Collaborated on a Kotlin Multiplatform (KMP) App Factory for streamlined deployment across Android and iOS.
- Designed and built a reusable ads component powered by the Xandr Mobile SDK.
- Implemented comprehensive monetization features, including video ads, interstitials, and banners across multiple client applications.

Senior Android Developer | Mode | 2021 - 2022

- Built features for Mode's Android app (50M+ downloads on Google Play).
- Developed key features designed to incentivize and increase daily active user presence on the application.
- Implemented a robust surveys feature that successfully integrated multiple third-party survey providers.
- Authored architecture documentation, partnered with Product for A/B testing validation, and orchestrated cross-team app releases to ensure an optimal user experience.

Android Developer | Trusona | 2017 - 2021

- Shipped the Trusona Android app (10K+ downloads on Google Play) and SDK.
- Designed and developed the Trusona SDK for Android, enabling third-party apps to implement the Trusona Authentication System.
- Designed and developed the official Trusona Mobile App for Android.
- Engineered robust features and automated release pipelines utilizing Kotlin, Java, TDD, and Fastlane within a Kanban environment.

Indie Apps

- [Faint](#): AI-powered coffee tasting journal for Android and iOS, built with Kotlin Multiplatform (KMP) and Compose Multiplatform (CMP).
- [Still](#): Food expiration tracker app, developed entirely with Kotlin Multiplatform (KMP) and Compose Multiplatform (CMP).

Open Source

- [frnk](#): Modular Kotlin Multiplatform toolkit with headless UI, pluggable backends, and MVI architecture; the foundation behind Faint and Still.

Education & Certifications

- Bachelor's Degree, Computer Software Engineering, Latina University, 2011 - 2014.
- Android Kotlin Developer Nanodegree Program, Udacity, 2020 - 2021.
- Diploma in Advanced Android Application Development, Cenfotec University, 2015.
- Associate Android Developer, Google Developers, 2021 - 2024.
- Certifications: Kotlin for Java Developers (Coursera), EF SET English Certificate (C1 Advanced).
