Juan Diego Garita

Senior Mobile Engineer · Kotlin Multiplatform & Android

Costa Rica · Remote (U.S. time zones) | hello@jdgarita.dev | jdgarita.dev | LinkedIn | GitHub

Summary

Senior mobile engineer with 10+ years building Android and Kotlin Multiplatform apps for U.S. companies, including apps with 10M+ and 50M+ downloads on Google Play. Experienced in A/B experimentation, ad monetization, authentication SDKs and release automation. Comfortable owning features end to end, from architecture to rollout, in Scrum and Kanban teams.

Technical Skills

- **Languages:** Kotlin, Java, Swift
- **Mobile:** Kotlin Multiplatform, Compose Multiplatform, Jetpack Compose, Android SDK, Coroutines & Flow
- **Architecture:** MVI, MVVM, Clean Architecture, SOLID, modularization
- **Libraries & services:** Koin, Ktor, Firebase, RevenueCat, PostHog, Sentry, Xandr (Microsoft) Mobile SDK
- **Practices & tooling:** TDD, unit testing, A/B testing, CI/CD, Fastlane, Gradle, Git, AI agents & MCP

Experience

Senior Android Engineer, Ascendion (client: Experian) Remote · Oct 2026 – Present

- Build features for the Experian® Android app (10M+ downloads on Google Play) on the mobile Experimentation team.
- Shipped 2 A/B experiments to production, testing UI/UX changes in key user flows.
- Improving the app's branding and its startup and load times.
- Build experiment capabilities that work within iOS constraints, keeping Android and iOS at feature parity for coordinated rollouts.

Senior Kotlin Multiplatform Engineer, Swiftly Remote · Sep 2022 – Aug 2026

- Owned ad monetization for a Kotlin Multiplatform "App Factory" that ships white-label retail apps to Android and iOS (~8 client apps).
- Designed and built a reusable ads component on the Xandr (Microsoft) Mobile SDK, adopted by every client app: one integration instead of one per app.
- Shipped banner, interstitial and video ad formats, and standardized impression tracking, giving the business more reliable ad reporting and higher measured impressions.

Senior Android Engineer, Mode Mobile Remote · Sep 2021 – Sep 2022

- Built features for the Mode Android app (50M+ downloads on Google Play).
- Built engagement features designed to bring users back daily and grow daily active users.
- Shipped a surveys feature that brought 3 third-party survey providers into a single experience.
- Wrote architecture documentation, validated features with Product through A/B tests, and coordinated cross-team releases.

Android Developer, Trusona Remote · Jul 2017 – Jun 2021

- One of two Android engineers on Trusona's passwordless authentication products.
- Designed and built the Trusona Android SDK, which lets third-party apps adopt Trusona authentication.
- Designed and built the official Trusona Android app (10K+ downloads on Google Play).
- Automated releases with Fastlane, cutting release time from a full day to a few hours; worked test-first (TDD) in Kotlin and Java in a Kanban flow.

Earlier experience

- **Android Developer, Gorilla Logic (client: DaVita)** · Nov 2016 – Jul 2017: bug fixing and stability work on DaVita's patient-facing Android app (Java).
- **Software Developer Senior Analyst, Accenture** · Jan 2015 – Nov 2016: Android feature development in Java for a Fortune 500 consumer-goods client.

Indie Apps & Open Source

- Faint: AI-powered coffee tasting journal for Android and iOS, built with Kotlin Multiplatform and Compose Multiplatform.
- Still: fridge and pantry tracker: log food in 3 taps, with best-by dates worked out on the device and no account. Android and iOS, Kotlin Multiplatform and Compose Multiplatform.
- frnk: open-source modular Kotlin Multiplatform toolkit (MVI, headless UI, Room, PostHog + Sentry, RevenueCat); the foundation behind Faint and Still.

Education & Certifications

- Bachelor's Degree, Computer Software Engineering, Universidad Latina de Costa Rica, 2011 – 2014
- Android Kotlin Developer Nanodegree, Udacity, 2021
- Diploma in Advanced Android Application Development, Universidad Cenfotec, 2015
- Associate Android Developer (Kotlin), Google, 2021 – 2024
- Kotlin for Java Developers (Coursera) · EF SET English Certificate, C1 Advanced
